

# TOP 10 REASONS WHY CLIENTS CHOOSE CMC FOR COLUMBARIA

1

## **We're not a vendor, dealer or reseller.**

We're a partner. Tell us your bigger business problem and watch us solve it.

2

## **We design and build.**

Every project is precision-engineered to your needs, requirements, constraints, conditions, and business.

3

## **We're an industry leader in funeral construction.**

That means we offer peace-of-mind the competition can't, including long-term liability reduction, quality control, product testing, superior material sourcing, consistent pricing and on-time installation.

4

## **Our columbaria are engineered by licensed structural engineers.**

Proper design and analysis by a licensed structural engineer assures that the columbaria systems and structures will support loads and resist fatigue.

5

## **Columbaria by CMC are designed by in-house engineers and architectural technicians.**

They're directly involved in all steps and all aspects of the design procedure, from computer-aided design to technical review to construction documents.

6

## **Columbaria by CMC are built using only the highest quality materials in the construction industry.**

We're construction professionals, with the proper commercial construction expertise your project demands.

7

## **We're there from start to finish.**

We design, fabricate and install every project. That means no more juggling vendors or confusing timelines or surprises.

8

## **Our columbaria are built to last.**

We only use non-deteriorating materials such as marine-grade aluminum, anodized aluminum, stainless steel, non-corrosive synthetics, commercial-grade epoxies, and high-quality, natural stone to ensure durability and integrity, and long-term liability-reduction.

9

## **We don't use sub-contracted labor.**

Your project will be handled directly by CMC employees and held to our standards.

10

## **We help you position yourself for a greater ROI.**

Columbaria from CMC position you to take advantage of a growing cremation industry, and we'll help keep that initial investment cost low.
